## 1.6.1 Credit portfolio

### Exposure at default by industry segment

Exposure at default, EAD, is the share of the approved credit that is expected to be drawn at the time of any future default at the same time as there is a downturn in the market.

The following tables show the exposure at default in DNB's customer segments and exclude central banks, equity positions and exposure in associated companies. EAD is based on the internal monitoring of credit risk where all exposures are measured with internal models. Sbanken has been included in the figures as of 30 June 2022.
