Directors' report

Second quarter financial performance

The DNB Bank Group ¹⁾ delivered solid results in the second quarter of 2017. Profits were NOK 4 702 million, an increase of NOK 482 million from the second quarter of 2016, driven by strong net interest income and lower impairment losses on loans and guarantees.

The common equity Tier 1 capital ratio was 15.8 per cent at end-June 2017, up from 14.5 per cent a year earlier and up 0.1 percentage points compared with end-March 2017.

The leverage ratio for the banking group was 7.0 per cent, up from 6.2 per cent a year earlier and 6.5 per cent at end-March 2017. The ratio was thus well above the requirement of 6 per cent which came into force on 30 June 2017.

Return on equity was 10.1 per cent, compared with 10.0 per cent in the year-earlier period.

Net interest income was up NOK 523 million from the second quarter of 2016, reflecting higher volumes, wider deposit spreads due to the rebalancing of deposits as well as lower long-term funding costs. Compared with the first quarter of 2017, there was profitable lending growth in all customer segments and an increase in lending spreads.

Net other operating income was NOK 3 034 million, down NOK 1 176 million from the second quarter of 2016. In 2016, income was positively affected by the sale of Visa Norge's holdings in Visa Europe, providing a gain of NOK 1 128 million. Compared with the year-earlier period, there was a positive contribution from commissions and fees.

Operating expenses were up NOK 295 million compared with the second quarter of 2016. The increase was mainly due to the introduction of financial activities tax in 2017, digitalisation projects and marketing of new digital services.

Impairment losses on loans and guarantees totalled NOK 597 million for the quarter, down NOK 1 724 million from the corresponding quarter in 2016. There was a reduction in both individual impairment losses and collective impairment losses, reflecting more stable economic conditions.

Important events in the second quarter

A number of new products and services were launched during the second quarter as part of DNB's ongoing automation and digitalisation initiatives. In early June, DNB launched the application 'Spare', a new tool for saving in accounts, equities or mutual funds. At the end of June, only four weeks after the app was launched, more than 165 000 people had started using the app.

Autolease underwent a green shift in June, when the company launched a new and improved digital platform while making it more beneficial for customers to choose electric and hybrid cars.

At the beginning of May, DNB introduced VippsGO, a new service in the Vipps app that makes both purchases and sales easier. The service will give the trade and services industry a digital boost and requires no investment. All that companies need to do is to list the goods on offer, including prices and possibly photographs and additional information, and customers use their mobile to pay.

In the middle of April, DNB launched the crowdfunding service startskudd.no as part of its initiatives to focus on start-up companies. As an extension to the NXT Conference held in the autumn of 2016, DNB launched NXT Community in the second quarter of 2017, a new digital meeting place where entrepreneurs and investors can meet and get access to expertise and advice offered by DNB. The aim is that the meeting place will help ensure that more good business ideas are realised and that this will also result in sound projects for investors.

During the quarter, DNB Markets launched new mobile services for investor services and foreign exchange trading.

In June, a new chatbot was launched for corporate customers contacting the customer centre. This means that waiting time will be reduced and that customers will be referred to a person with the right competencies more quickly.

DNB's reputation score improved substantially, from 63.6 points in the first quarter to 70.6 points in the second quarter.

Even though the banking agreement with NorgesGruppen expired on 1 June, DNB will continue to offer banking services in post offices and shops across Norway. DNB thus still has the best availability in the market for manual banking services.

On 15 June, the banking group experienced a period of system downtime. The problems affected the Internet bank, the mobile bank and SMS services, as well as equity and currency trading in the mobile and Internet banks. DNB is working continuously to increase system stability.

At the Annual General Meeting in April, Gro Bakstad was elected as a member of DNB Bank's Board of Directors, succeeding Jarle Bergo.

In a survey carried out by Universum, DNB was ranked as the most attractive employer in Norway among business students for

¹⁾ DNB Bank ASA is a subsidiary of DNB ASA and part of the DNB Group. The DNB Bank Group, hereinafter called "the banking group", comprises the bank and the bank's subsidiaries. Other companies owned by DNB ASA, including DNB Livsforsikring, DNB Forsikring and DNB Asset Management, are not part of the banking group. Operations in DNB ASA and the total DNB Group are not covered in this report but described in a separate report and presentation.

the fourth year in a row and climbed from eighth to third place among IT students.

During the quarter, DNB Markets was ranked second within equity analysis in the Nordics in an annual customer survey undertaken by Extel.

During the second quarter, the Norwegian government and Finanstilsynet proposed a number of measures to protect consumers against irresponsible lending practices. The measures aim to ensure that banks make sound credit assessments and that customers make good, informed choices. The measures are described in further detail below.

In mid-June, the Norwegian government approved the rules on a share savings account with effect from 1 September 2017. This means that individual taxpayers can open a share savings account, using deposits to invest in equity funds, listed shares and listed equity certificates. Gains on the sale of securities in the account will not be taxed in connection with the sale, but when money is withdrawn from the account.

Half-year financial performance

The banking group recorded profits of NOK 8 954 million in the first half of 2017, down NOK 164 million from the first half of 2016. Return on equity was 9.7 per cent compared with 10.8 per cent in the year-earlier period.

Net interest income increased by NOK 362 million from the previous year. Volumes were up and average lending and deposit spreads contracted compared with the previous year. There was an average increase in the healthy loan portfolio of 0.8 per cent parallel to a 4.5 per cent increase in average deposit volumes from the first half of 2016. Average lending spreads for the customer segments narrowed by 0.03 percentage points, and deposit spreads by 0.01 percentage points.

Net other operating income decreased by NOK 2 742 million from the first half of 2016. Adjusted for basis swaps and non-recurring effects relating to the sale of Visa Norge's holdings in Visa Europe, net other operating income was reduced by NOK 318 million. Net commissions and fees were up NOK 258 million, or 9.4 per cent, compared with the first half of 2016, mainly due to increased activity in DNB Markets.

Total operating expenses increased by NOK 58 million from the first half of 2016.

Impairment losses on loans and guarantees totalled NOK 1 159 million in the first half of 2017, down NOK 2 910 million from the high impairment level in the year-earlier period when adjusted for the sale of non-performing portfolios in the first quarter of 2016. There was a decrease in individual impairment losses of NOK 1 676 million, stemming primarily from the large corporate segment. Parallel to this, there was a reduction in collective impairment losses, reflecting more stable economic conditions in oil-related industries.

Second quarter income statement – main items

Net interest income

| Amounts in NOK million | 2nd quarter | | 2nd quarter |
|---|-------------|--------|-------------|
| | 2017 | Change | 2016 |
| Net interest income | 9 146 | 523 | 8 623 |
| Other net interest income | | 168 | |
| Long-term funding costs | | 126 | |
| Lending and deposit volumes, customer segments | | 115 | |
| Interest on income subject to impairment provisions | | 68 | |
| Exchange rate movements | | 40 | |
| Equity and non-interest bearing instruments | | 29 | |
| Lending and deposit spreads, customer segments | | 14 | |
| Amortisation effects and fees | | (37) | |

Net interest income increased by NOK 523 million from the second quarter of 2016. For the customer segments, higher volumes and the rebalancing of deposits had a positive effect on net interest

income in the second quarter of 2017. Average lending spreads contracted by 0.01 percentage points while deposit spreads widened by 0.01 percentage points. Volume-weighted spreads for the customer segments narrowed by 0.01 percentage points compared with the same period in 2016, but widened by 0.03 percentage points compared with the first quarter of 2017. There was an average increase of NOK 27.8 billion or 1.9 per cent in the healthy loan portfolio compared with the second quarter of 2016. During the same period, deposits were up NOK 45.2 billion or 4.8 per cent. Adjusted for exchange rate movements, loans increased by 1.4 per cent and deposits by 4.3 per cent.

Net other operating income

| Amounts in NOK million | 2nd quarter | | 2nd quarter |
|---|-------------|---------|-------------|
| | 2017 | Change | 2016 |
| Net other operating income | 3 034 | (1 176) | 4 210 |
| Basis swaps | | 329 | |
| Net commissions and fees | | 72 | |
| Net gains on other financial instruments | | (32) | |
| Other operating income | | (49) | |
| Exchange rate effects Additional Tier 1 capital | | (367) | |
| Sale of holdings in Visa | | (1 128) | |

Net other operating income declined by NOK 1 176 million or 27.9 per cent from the second quarter of 2016 due to a positive one-off effect in 2016 related to the sale of Visa Norge's holdings in Visa Europe. Adjusted for this effect, net operating income decreased by NOK 48 million in the second quarter. There was an increase in net commissions and fees, mainly due to higher activity within real estate broking and investment banking. Exchange rate effects on additional Tier 1 capital gave a negative contribution of NOK 367 million.

Operating expenses

| Amounts in NOK million | 2nd quarter | | 2nd quarter |
|--|-------------|--------|-------------|
| | 2017 | Change | 2016 |
| Operating expenses | (5 476) | (295) | (5 180) |
| Other costs | | (18) | |
| Marketing etc | | (30) | |
| Salaries and other personnel exp. (excl. pensions and restructuring costs) | | (79) | |
| Provisions for financial activities tax | | (88) | |
| Fees | | (96) | |
| Restructuring costs ¹⁾ | | 14 | |
| Operating expenses excl. non-recurring effects, of which: | | (309) | |
| Exchange rate effects for units outside Norway | | 12 | |
| Currency-adjusted operating expenses | | (321) | |

1) Non-recurring effects.

Operating expenses increased by NOK 295 million compared with the second quarter of 2016. Underlying operating expenses were NOK 309 million higher than in the year-earlier period. The increase stemmed mainly from the introduction of financial activities tax in 2017 and a higher level of activity in digitalisation projects and marketing.

In the second quarter of 2017, the cost/income ratio was 45.0 per cent.

Impairment of loans and guarantees

Impairment losses on loans and guarantees totalled NOK 597 million in the second quarter, of which collective impairment losses represented 7.4 per cent.

Individual impairment losses were reduced by around 65 per cent compared with the second quarter of 2016. The decrease was a result of successful restructuring of portfolios within shipping and oil and offshore-related segments.

There was also a reduction in collective impairment, reflecting somewhat more stable economic conditions in these industries.

Net non-performing and doubtful loans and guarantees increased by NOK 2.9 billion from end-June 2016, totalling NOK 23.5 billion at end-June 2017. This represented 1.35 per cent of the loan portfolio, up from 1.19 per cent at end-June 2016. The increase mainly stemmed from the oil and shipping-related portfolio. There are no signs of negative spill-over effects from the situation in the oil-related industries in the other credit portfolios, and non-performing and doubtful loans and guarantees were roughly at the same level as at end-March 2017.

Taxes

The banking group's tax expense for the second quarter of 2017 is estimated at NOK 1 409 million, or 23.0 per cent of pre-tax operating profits.

Financial performance, segments

Financial governance in the banking group is adapted to the different customer segments. Reported figures reflect total sales of products and services to the relevant segments.

Personal customers

| Income statement in NOK million | 2nd quarter | | Change | |

- 1) Calculated relative to the 3-month money market rate. See page 46 for additional information about alternative performance measures (APMs).
- 2) Calculated on the basis of allocated capital, corresponding to the external capital adequacy requirement which must be met by the DNB Group. See page 46 for additional information about alternative performance measures (APMs).

The increase in pre-tax operating profit from the second quarter of 2016 was mainly attributable to higher net interest income.

There was a healthy rise in average loans from the second quarter of 2016. Deposit volumes remained stable, but adjusted for an internal transfer of deposits from associations and clubs to the SME segment in December 2016, there was an increase of 2.1 per cent. Higher loan volumes contributed to a rise in net interest income compared with both the second quarter of 2016 and the first quarter of 2017. Volume-weighted spreads contracted by 0.02 percentage points from the second quarter of 2016, but widened by 0.03 percentage points from the first quarter of 2017.

Net other operating income was on a level with the second quarter of 2016, but increased by 16.8 per cent from the first quarter of 2017. A high level of activity in DNB Eiendom had a positive effect, while regulations on interchange fee rates effective as of 1 September 2016 and rising costs related to SAS Eurobonus agreements had a negative impact on income from payment transfers during the period.

There was a moderate rise in operating expenses compared with the second quarter of 2016. A reduction in ordinary salaries due to restructuring was offset by costs attributable to the financial activities tax, increased activity within real estate broking and IT development.

Close to 95 per cent of loans to personal customers represent well-secured home mortgages entailing low risk. Impairment losses on loans remained at a stable low level in the second quarter of 2017.

The market share of credit to households stood at 24.8 per cent at end-May 2017, while the market share of home mortgages was 28.1 per cent. The market share of total household savings was 31.2 per cent. DNB Eiendom had a market share of 19.9 per cent in the second quarter of 2017.

Customers' use of digital services is increasing, and DNB is continuing to digitise its products and services. A new app, 'Spare', which gives a clear overview of customers' total finances in DNB as well as investment advice, while motivating them to save, was launched in the second quarter of 2017. At end-June, the app had been downloaded by more than 165 000 unique users.

DNB aspires to achieve continued profitable growth in the personal customer segment. Impairment losses on loans are expected to remain stable at a low level.

Small and medium-sized enterprises

| Income statement in NOK million | 2nd quarter | | Change | |

- 2) Calculated on the basis of allocated capital, corresponding to the external capital adequacy requirement which must be met by the DNB Group. See page 46 for additional information about alternative performance measures (APMs).

Higher net interest income combined with a reduction in net impairment losses on loans contributed to a solid increase in pre-tax operating profits from the second quarter of 2016.

There was strong growth in both lending and deposit volumes compared with the second quarter of 2016. The rise in deposits reflected an internal transfer of deposits from the personal customer segment. Adjusted for this transfer, deposits nevertheless grew by 13 per cent. Higher volumes ensured a healthy rise in net interest income compared with the second quarter of 2016. Lending spreads were stable, while deposit spreads narrowed slightly during the period.

The trend in other operating income reflected somewhat lower activity within sales of currency and interest rate hedging products as a result of the weak Norwegian krone and expectations of continued low interest rates.

The increase in operating expenses from the second quarter of 2016 was partly due to a higher level of activity within IT development. The financial activities tax introduced in 2017 also contributed to a higher cost base.

On an annual basis, net impairment losses on loans represented 0.19 per cent of average loans in the second quarter of 2017, a reduction from 0.33 per cent in the year-earlier period. The general quality of the banking group's portfolio of loans to small and medium-sized corporate customers remained high and showed no signs of deteriorating during the period. Developments in oil-related sectors as well as all other sectors are closely monitored, and preventive measures are continually considered and implemented to retain the strong portfolio quality.

The banking group expects lending growth to small and medium-sized corporate customers to be on a level with the expected domestic credit growth to this customer segment.

Large corporates and international customers

| Income statement in NOK million | 2nd quarter | | Change | |

- 1) Calculated relative to the 3-month money market rate. See page 46 for additional information about alternative performance measures (APMs).
- 2) Calculated on the basis of allocated capital, corresponding to the external capital adequacy requirement which must be met by the DNB Group. See page 46 for additional information about alternative performance measures (APMs).

Lower net impairment losses on loans were the main contributor to the increase in pre-tax operating profits compared with the second quarter of 2016.

Average lending volumes were down 4.8 per cent from the second quarter of 2016. Adjusted for exchange rate movements, the underlying volume was reduced by 6.1 per cent. The rebalancing of the business area's portfolio continued in the second quarter of 2017. As a result of the restructuring of portfolios within shipping and oil and offshore-related segments, there was a reduction in loan volumes to these industries, while there was a rise in lending to other industries during this period. Customer deposits were up 3.5 per cent from the second quarter of 2016. Adjusted for exchange rate movements, the increase was 2.5 per cent.

Higher deposit volumes and wider deposit spreads contributed to raising net interest income and compensated for the effect of lower loan volumes. In addition, there was a positive effect from interest payments on non-performing loans compared with the second quarter of 2016.

Other operating income declined from the second quarter of 2016, partly due to high gains from equity investments in 2016. Other operating income rose by 3.6 per cent from the first quarter of 2017. Income from investment banking products increased compared with both the second quarter of 2016 and the first quarter of 2017. There was increasing activity towards the end of the quarter, especially in the debt capital markets, but also in the equity capital markets.

The increase in expenses from the second quarter of 2016 reflected higher expenses related to the work on compliance and anti-money laundering. In addition, several ongoing digitalisation initiatives gave an increase in costs during the quarter. The number of full-time positions was reduced by 128 from end-June 2016. The reductions took place in both Norwegian and international operations.

Net impairment losses on loans and guarantees were down from the second quarter of 2016. On an annual basis, net impairment represented 0.29 per cent of average loans, compared with 1.53 per cent in the year-earlier period. Individual impairment was reduced from 0.98 per cent in the second quarter of 2016, to 0.25 per cent. The reduction in impairment losses reflected generally more stable economic conditions compared with the second quarter of 2016. The oil price has stabilised at a somewhat higher level, and several of the largest offshore-related exposures have been successfully restructured. Net non-performing and doubtful loans and guarantees amounted to NOK 17.2 billion at end-June 2017, up from NOK 16.0 billion a year earlier.

Due to increasing capital requirements over the past few years, the business area needs to make more efficient use of capital by reducing its exposure to capital-intensive and cyclical industries. Additional measures to achieve higher non-lending income and reduce capital usage are to increase portfolio turnover, reduce final hold and use the capital markets more actively. Overall, this will contribute to raising the return on equity.

Trading

This segment comprises market making and other trading in foreign exchange, fixed-income, equity and commodity products, including the hedging of market risk inherent in customer transactions. Customer activities are supported by trading activities.

|---|------|------|--|--|

- 1) Calculated on the basis of allocated capital, corresponding to the external capital adequacy requirement which must be met by the DNB Group. See page 46 for additional information about alternative performance measures (APMs).

There was a decline in market volatility and activity levels compared with the "Brexit quarter" last year. Total income declined from a high level in the second quarter of 2016. There was a reduction in income from money market, interest rate and foreign exchange trading. Bond values increased by NOK 86 million due to slightly narrower spreads.

Funding, liquidity and balance sheet

The short-term funding markets were sound in the second quarter of 2017. The European market has been characterised by limited interest in short maturities, while the rising yield curve in the US has rekindled interest in longer maturities. In line with expectations,

more banks are able to use the US commercial paper market, which has resulted in a certain rise in prices for the banking group and the bank's Scandinavian peers. The banking group had ample access to short-term funding throughout the quarter.

The level of activity in the long-term funding markets was somewhat lower in the second quarter than in the first, but picked up towards the end of the quarter. Issue activity in the euro market for covered bonds was lower in the first half of 2017 than in the corresponding period in 2016. This was largely due to the final round of the ECB's targeted longer-term refinancing operations, TLTRO, which somewhat reduced the need to issue secured bonds. Activity levels in the market for ordinary senior bonds continued to decline as an increasing number of issuers have started to issue subordinated senior bonds which meet the minimum requirement for own funds and eligible liabilities, MREL. This has also resulted in a higher level of activity in the market for subordinated loans (Tier 2), as such loans have become more interesting to investors than subordinated senior bonds. Prices of both senior bonds and covered bonds remain roughly at the same low level as in the first quarter.

The nominal value of long-term debt securities issued by the banking group was NOK 578 billion at end-June 2017 and NOK 605 billion a year earlier. The average remaining term to maturity for these debt securities was 4.1 years at end-June 2017, up from 4.0 years a year earlier.

The short-term liquidity requirement, Liquidity Coverage Ratio, LCR, remained stable at above 100 per cent throughout the second quarter and was 123 per cent at end-June.

Total assets in the banking group were NOK 2 402 billion at end-June 2017, up from NOK 2 373 billion a year earlier.

The average net loans to customers increased by NOK 28 billion from end-June 2016. Average customer deposits were up NOK 45 billion or 4.8 per cent during the same period. The ratio of customer deposits to net loans to customers was up from 62.9 per cent at end-June 2016 to 66.2 per cent a year later. This is in line with the ambition to have a ratio of customer deposits to net loans of minimum 60 per cent for the DNB Bank Group.

Risk and capital adequacy

The banking group quantifies risk by measuring economic capital. Economic capital increased by NOK 2.1 billion from end-March 2017, to NOK 71.4 billion at end-June 2017.

Economic capital for the banking group

| | 30 June 2017 | 31 March 2017 | 31 Dec. 2016 | 30 June 2016 |
|--|-----------------|------------------|-----------------|-----------------|
| <i>Amounts in NOK billion</i> | | | | |
| Credit risk | 56.2 | 54.8 | 54.4 | 55.8 |
| Market risk | 7.8 | 8.1 | 6.9 | 7.0 |
| Operational risk | 8.5 | 8.5 | 8.6 | 8.6 |
| Business risk | 7.2 | 7.2 | 6.4 | 6.4 |
| Gross economic capital | 79.7 | 78.6 | 76.4 | 77.8 |
| Diversification effect ¹⁾ | (8.3) | (9.3) | (9.3) | (9.0) |
| Net economic capital | 71.4 | 69.3 | 67.1 | 68.8 |
| Diversification effect in per cent of gross economic capital ¹⁾ | 10.4 | 11.8 | 12.1 | 11.5 |

1) *The diversification effect refers to the risk-mitigating effect achieved by the banking group by having operations which are affected by different types of risk where unexpected losses are unlikely to occur at the same time.*

Economic capital for credit risk increased by NOK 1.4 billion through the quarter. The increase in economic capital reflected an upward adjustment of LGD (loss given default) in the large corporates and international customers segment. In March 2017, the banking group was notified by Finanstilsynet of a possible requirement to increase LGD for the large corporate models in consequence of a prolonged decline. Internal calculations also showed that LGD should be adjusted somewhat upwards. An upward adjustment of LGD in line with the notification was implemented

during the second quarter of 2017. There is still extensive restructuring in the rig and offshore segments, while there are signs of recovery in industries which are exposed to oil price fluctuations. The number of new orders has increased, and industry players have shown that they can succeed in restructuring their operations and cutting costs. As a result of the increased LGD level, risk-weighted assets rose by NOK 78 billion, calculated according to the Basel III regulations. The effect of the Basel I floor in the form of higher risk-weighted assets has been reduced to approximately NOK 22 billion for the banking group.

The banking group's market risk exposure in operations decreased slightly during the second quarter due to reduced basisswap exposure.

The operational risk situation in the second quarter was not considered to be satisfactory. A business disruption on 15 June resulted in errors and downtime for several of the bank's customer services. A number of measures have been implemented to increase capacity and ensure better stability in the IT systems in the period ahead. The banking group was not affected by the massive ransomware attacks in May and June, though the threat level is considered to be high. Strong emphasis is being placed on strengthening the the banking group's security solutions to counter digital attacks.

Calculated according to transitional rules, risk-weighted assets were NOK 1 061 billion, slightly up from NOK 1 059 billion at end-June 2016. The common equity Tier 1 capital ratio was 15.8 per cent, while the capital adequacy ratio was 20.0 per cent.

New regulatory framework

New rules on deposit guarantee scheme and crisis management for banks

The Ministry of Finance has proposed new legislation to the Norwegian parliament (Stortinget) for banking crisis resolution and the deposit guarantee scheme. The amending legislation will implement the EU Bank Recovery and Resolution Directive (BRRD) and the revised directive on Deposit Guarantee Schemes (DGS) in Norway. Both directives are EEA relevant, but have not yet been included in the EEA Agreement.

Among other things, the Ministry of Finance proposes that plans be drawn up for the recovery and crisis management of individual banks, and that Finanstilsynet be given new tools to intervene at an early stage when banks have financial problems. Among the proposed crisis resolution measures, internal recapitalisation (bail-in) is the most significant change compared with current legislation. Bail-in implies that parts of the debt of the bank in resolution are converted to equity, whereby losses are covered and the bank is capitalised to a level where operations can be continued.

Norway currently has one of the best capitalised deposit guarantee funds in Europe. At year-end 2016, the fund amounted to NOK 32.5 billion, equivalent to 2.75 per cent of total guaranteed deposits. In line with the EU directives, the Ministry of Finance proposes to transfer the capital to two new funds that will fund the deposit guarantee and resolution measures. The directives require that the funds represent minimum 1.8 per cent of guaranteed deposits in 2024. The level of capital in both Norwegian funds already exceeds the target set by the EU.

In addition, the Ministry of Finance proposes to retain the requirement of annual payments from the banks to the funds. Payments from DNB to the funds will be higher than today. This is mainly due to the fact that the duty to contribute to the resolution fund will also apply to DNB's mortgage institutions. Payments to the new funds will be more strongly differentiated according to risk, which implies that the banks with the highest risk level must pay a larger share.

The Ministry of Finance proposes to retain the general deposit guarantee of NOK 2 million per depositor per bank. The government is in talks with the EU to continue to retain this deposit guarantee level when the revised DGS directive is implemented in the EEA Agreement.

Agreement in the EU on securitisation

The securitisation institute in Europe is undergoing extensive modernisation after it was subject to much negative attention during the financial crisis. As part of the work on the Capital Markets Union (CMU), the European Commission has emphasised that the reestablishment of sound securitisation markets will be a key measure to achieve economic growth. Increasing the use of securitisation will free up capacity on the banks' balance sheets, partly to ensure increased access to credit for small and medium-sized enterprises.

On 30 May, the European Parliament and the Council of the European Union agreed on a framework to facilitate so-called STS securitisation (simple, transparent and standardised securitisation). In the EU, the various players have had particularly diverging views with respect to the stake to be retained by originators in connection with securitisation ("risk retention"). The compromise which has now been reached implies that the originator must retain a stake of 5 per cent. This requirement shall ensure that securitised products are not created solely for the purpose of distribution to investors.

The framework for facilitating so-called STS securitisation is believed to be EEA relevant and must therefore be introduced in Norway. In the longer term, a well-functioning securitisation institute could be important for the supply of capital to the business community and for banks' adaptation to the capital adequacy regulations. In addition, securitisation will provide greater investment opportunities for pension capital managers and give investment firms new business opportunities.

Request for comments on PSD2 implementation

The EU's revised Payment Services Directive (PSD2) regulates new players in the payment market and new payment services. The purpose is to strengthen competition in the payment market and make the market more effective than it is today. As an example, the directive allows customers to choose other providers than banks to carry out their payments.

On 28 April, the Ministry of Finance circulated for public comment draft rules on the implementation of parts of PSD2. PSD2 will enter into force in the EU on 13 January 2018. However, the directive has not yet been incorporated in the EEA Agreement, and no deadline has thus been set for its implementation in Norway. According to the Ministry of Finance, it would be an advantage if PSD2 would take effect as closely as possible to its entry into force in the EU.

Guidelines for the treatment of consumer loans and credit cards

During the first half of the year, the Norwegian government and Finanstilsynet implemented a number of measures to protect consumers against irresponsible lending practices, including guidelines for consumer loans, regulations on the marketing of credit, regulations on the invoicing of credit card debt and draft legislation whereby private players can be granted licences to provide credit information in connection with credit scoring.

On 7 June, Finanstilsynet published guidelines for responsible lending practices for consumer loans. The guidelines aim to reduce the risk that customers incur levels of debt that they are later unable to service, while contributing to sound banks. The guidelines apply to all unsecured credit to consumers, including credit and payment cards. Just as for home mortgages, the guidelines set requirements for debt servicing capacity, maximum loan-to-income ratio and instalment payments. As from the fourth quarter of 2017, banks shall report compliance with the guidelines to their own Board of Directors.

Non-risk based capital requirement, leverage ratio

As a supplement to the risk-weighted capital requirements and as a measure to counter adjustments and gaps in the regulations, a non-risk based capital requirement, "leverage ratio", will also be introduced. The Ministry of Finance has set a minimum requirement of 3 per cent as of 30 June 2017. All banks must have a buffer on top of the minimum requirement of minimum 2 per cent.

Systemically important banks must have an additional buffer of minimum 1 per cent. As a systemically important bank in Norway, the total requirement for DNB will thus be 6 per cent. As at 30 June 2017, the banking group had a leverage ratio of 7.0 per cent.

Macroeconomic developments

Global GDP growth ended at 3.0 per cent in 2016 and looks set to be slightly higher this year. Growth will probably increase further in 2018. A rise is expected for both industrialised countries and emerging economies, though the level of growth is expected to remain low in the industrial countries. Nevertheless, a further decline in unemployment is anticipated in these countries, while price inflation will remain below the central banks' targets.

The Chinese economy continued to grow strongly in 2016, by 6.7 per cent, which was in line with the authorities' ambition of a growth rate between 6.5 and 7.0 per cent. The pace of growth has slowed somewhat in 2017, with a weaker development within real estate and infrastructure investments. Growth is expected to decelerate further during the year, but large parts of the economy, including consumption, remain strong and contribute to a relatively moderate slowdown. Due to factors such as high debt levels and unprofitable investments, there is a risk of a crisis further ahead in time. 2016 was a quite good year for the Japanese economy, which grew by 1.0 per cent from the year before. A slightly lower future growth rate is expected, reflecting the limited growth potential caused, among other things, by demographic factors.

In the United States, the cyclical upturn looks set to continue. There was weak growth in the first quarter, though this was probably due to temporary factors. The level of activity is expected to pick up next year as a result of an expansionary fiscal policy. The rate of unemployment has declined further, while employment growth has been somewhat weaker in recent months. Overall, the labour market is still strong. Wage growth is nevertheless moderate and price inflation is just below the Federal Reserve's 2 per cent target. An expansionary monetary policy has supported the US recovery in recent years. However, monetary policy is expected to be normalised in the coming period. The Federal Reserve raised its policy rate in both March and June and is expected to implement further rate increases in December this year and twice next year. In addition, the Federal Reserve will probably start to scale down its balance sheet by reducing reinvestments in Treasury bills and mortgage-backed securities during the year.

In the euro area, GDP growth in the first quarter was higher than expected and confidence indexes for households and businesses indicate a further recovery. Business investment is up and will probably represent a higher share of GDP after many years of sluggish growth. However, the confidence indexes appear to focus too strongly on activity levels. Moreover, consumption is expected to decline in step with higher inflation and lower growth in households' real income. Wage growth is still low and inflation is likely to remain below the central bank target for a long time. The European Central Bank will probably continue to pursue an expansionary monetary policy for many years and to gradually scale down its asset purchases, which will not end until 2019.

In the UK, there will probably be significantly weaker growth in the period ahead as a result of uncertainty about the exit agreement with the EU and new trade agreements. This will probably contribute to lowering both consumption and investments. In consequence of weaker growth, the Bank of England will keep its policy rate unchanged for a long time, in spite of the temporary high inflation resulting from the depreciating pound in the aftermath of the Brexit vote. Uncertainty regarding the process around Brexit

and the results thereof makes future prospects more unpredictable than normal.

GDP growth for Mainland Norway was significantly stronger in the first quarter of the year than throughout last year and also showed signs of being broadly based. A less pronounced drop in oil investments and a certain rise in private consumption are expected to provide a slight increase in growth this year. From next year onwards, the upswing will be curbed by lower housing investment and a more neutral contribution from fiscal policy. Unemployment seems to have peaked. The unemployment rate has dropped from its highest level, as measured by both Statistics Norway's labour force survey and the Norwegian Labour and Welfare Administration's statistics of registered unemployed people. Employment growth has also increased somewhat, but is still moderate.

The tightening of the home mortgage lending regulation as of 1 January 2017 has contributed to prices levelling off during the first six months of this year. Combined with greater housebuilding activity and the fact that mortgage rates appear to have bottomed out, this is expected to result in housing prices levelling off over the next few years. A general improvement in the Norwegian economy and continued low interest rates limit the downside in housing prices.

Consumer price growth has slowed markedly since the summer of 2016. The weak Norwegian krone gave a temporary rise in inflation in 2016 and lower price growth was expected when exchange rate effects were phased out of the inflation figures. However, the decline emerged more quickly and was stronger than expected. The parties in the labour market agreed on a framework for the wage negotiations of 2.4 per cent, which indicates that domestic price pressure will remain moderate in the period ahead.

Future prospects

DNB's principal target is to achieve a return on equity above 12 per cent towards 2019. Several factors will contribute to reaching the return on equity target, including strong emphasis on profitability, lower impairment and more efficient use of capital.

Volume-weighted spreads are anticipated to widen somewhat in 2017, while lending volumes are expected to be stable in 2017 and 2018. During this period, total loans are expected to increase for personal customers and small and medium-sized enterprises, while the banking group will actively reduce its portfolio of loans to large corporates and international customers. In 2019, total lending volume growth is expected to return to a normalised level of 2 to 3 per cent.

DNB aims to increase commission and fee income by approximately 3 per cent per year. Total impairment losses for the period 2016 to 2018 are estimated to be up to NOK 18 billion, with the highest impairment losses during the first part of the period.

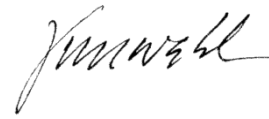

DNB has set a target for its common equity Tier 1 capital ratio of 16.0 per cent from year-end 2017, including the announced change in the counter-cyclical buffer.

1) Currency translation effects related to the Baltics represented a gain of NOK 574 million in the second quarter of 2017.

2) Hedging of net investments in the Baltics represented a loss of NOK 372 million in the second quarter of 2017, net of tax.

3) DNB had indirect ownership interests in Visa Europe through its membership in Visa Norge. In connection with the valuation of the holdings in Visa Europe as at 31 March 2016 an accumulated gain of NOK 855 million was recognised in other comprehensive income. Upon the completion of the acquisition of Visa Europe by Visa Inc in the second quarter of 2016, this amount was reclassified to profit and a total gain of NOK 1 128 million was recognised as "Profit from investments accounted for by the equity method" in the income statement.

Note 1 Basis for preparation

The quarterly financial statements for the DNB Bank group have been prepared in accordance with IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board and as adopted by the European Union. DNB Bank ASA has prepared the financial statements according to the Norwegian Ministry of Finance's regulations on annual accounts, Section 1-6, on the use of IFRS. When preparing the consolidated financial statements, management makes estimates, judgments and assumptions that affect the application of the accounting principles and the carrying amount of assets, liabilities, income and expenses. Estimates and assumptions are subject to continual evaluation and are based on historical experience and other factors, including expectations of future events that are believed to be probable on the balance sheet date. A description of the accounting policies, significant estimates and areas where judgment is applied by the DNB Bank group, appear in note 1 Accounting principles in the annual report for 2016.

The customer segments were redefined in first quarter 2017. See note 2 Segments for further information. The change only impacts the allocation between the segments and has no impact to the DNB Bank group's financial statements. The numbers for the comparable periods have been restated.

Note 2 Segments

Financial governance in DNB is geared to the different customer segments. The follow-up of total customer relationships and segment profitability are two important dimensions when making strategic priorities and deciding where to allocate the DNB Bank Group's resources. Special product areas are responsible for production and development for parts of the product range and for ensuring that DNB Bank Group meets the needs of the various customer segments. Reported figures for the different segments will reflect the banking group's total sales of products and services to the relevant customer segments. Following the reorganisation announced in September 2016, the DNB Bank Group has changed its distribution of the profit from DNB Finans' operations between the three customer segments. As of 1 January 2017, profit from DNB Finans' operations in Sweden are divided between the personal customer segment, the small and medium-sized enterprises segment and the large corporates and international customers segment. Profit from DNB Finans' operations in Denmark are divided between the small and medium-sized enterprises segment and the large corporates and international customers segment. Previously, profits from these operations were included in the large corporates and international customers segment. The distribution of profit from DNB Finans' operations in Norway on the various segments has also been changed. Figures for 2016 have been adjusted correspondingly.

- | | |
|--|--|
| Personal customers | - includes the banking group's total products and activities to private customers in all channels, both digital and physical. DNB Bank Group offers a wide range of products through Norway's largest distribution network, comprising branches, telephone banking (24/7), digital banking, real estate broking as well as external channels (post offices and in-store postal and banking outlets). Credit cards and consumer financing in Sweden are also included in this business area. |
| Small and medium sized enterprises | - is responsible for product sales and advisory services to small and medium-sized enterprises in Norway. Customers in this segment range from small businesses and start-up companies to relatively large corporate customers, and the product offerings are adapted to the customers' different needs. Small and medium-sized enterprises are served through the banking group's physical distribution network throughout Norway as well as digital and telephone banking (24/7). Factoring, leasing and asset financing for small and medium-sized enterprises in Sweden and Denmark are also included in this business area. |
| Large corporates and international customers | - includes large Norwegian and international corporate customers and all customers served by the DNB Bank Group's subsidiary banks in the Baltics and Poland. Operations are based on sound industry expertise and long-term customer relationships. |
| Trading | - includes market making and other trading activities in fixed income, currencies and commodities (FICC) as well as equities, including risk management of the risk inherent in customer transactions. Markets' trading activities support the customer activities. |

The income statement and balance sheet for the segments have been prepared on the basis of internal financial reporting for the functional organisation of the DNB Bank Group into segments, as reported to group management (chief operating decision maker) for an assessment of current developments and the allocation of resources. Figures for segments are based on the banking group's accounting principles and DNB's management model. Allocation of costs and capital between segments involves a number of assumptions, estimates and discretionary distributions.

Capital allocated to the segments is calculated on the basis of the DNB bank group's common equity Tier 1 capital and long-term capitalisation ambition. The allocation of capital to all units is based on the banking group's adaptation to Basel III with capital requirement related to credit risk, market risk and operational risk. The allocation of capital for credit risk is based on the DNB bank group's internal measurement of risk-adjusted capital requirements for credit. Capital requirements for market risk are allocated directly in accordance with risk-weighted volume, and operational risk is allocated based on the respective units' total income.

1) Loans to and deposits from customers in the Baltics are included under Large corporates and international customers in spite of being reclassified as assets and liabilities held for sale in August 2016. The reclassification is reflected under Other operations/elimination. Reclassified loans amounted to NOK 46.8 billion and deposits to NOK 37.9 billion.

2) Loans to customers include accrued interest, impairment and value adjustments. Correspondingly, deposits from customers include accrued interest and value adjustments.

3) Allocated capital for the segments is calculated based on the external capital adequacy requirement (Basel III) which must be met by the banking group. The capital allocated in 2017 corresponds to a common equity Tier 1 capital ratio of 18.0 per cent compared to 17.2 per cent in 2016. Recorded capital is used for the banking group.

4) Total operating expenses relative to total income.

5) Deposits from customers relative to loans to customers. Calculated on the basis of average balance sheet items.

Other operations/eliminations

Other operations/eliminations include IT and Operations, HR (Human Resources), Group Finance including Group Treasury, Risk Management, Corporate Communications, Vipps and Payments, the partially owned company Eksportfinans and investments in IT infrastructure. In addition, Other operations/eliminations include that part of the banking group's equity that is not allocated to the segments. Profits from repossessed operations which are fully consolidated in the DNB Bank Group are presented net under "Profit from repossessed operations" in the internal reporting of segments. The acquired companies and all intra-group eliminations are included in Other operations/eliminations.

Pre-tax operating profit

Note 3 Capital adequacy

Capital adequacy is calculated and reported in accordance with the EU capital requirements regulations for banks and investment firms (CRD IV/CRR). The regulatory consolidation deviates from consolidation in the accounts and comprises the parent company, subsidiaries and associated companies within the financial sector. Associated companies are consolidated pro rata. The figures as at 30 June 2017 are partially based on estimates.

| | 22.8 | Capital ratio, transitional rules, excluding 50 per cent of profit for the period (%) | 19.6 | |

Note 3 Capital adequacy (continued)

Basel III

The majority of the credit portfolios are reported according to the IRB approach. However, one portfolio, banks and financial institutions (DNB Bank) is still subject to final IRB approval from Finanstilsynet.

1) EAD, exposure at default.

2) Due to transitional rules, the minimum capital adequacy requirements cannot be reduced below 80 per cent of the corresponding figure calculated according to the Basel I regulations.

Note 4 Liquidity risk

Liquidity risk is the risk that the DNB Bank Group will be unable to meet its payment obligations. Overall liquidity management in the banking group implies that DNB Bank ASA is responsible for funding domestic and international group entities. Liquidity risk is managed and measured by means of various measurement techniques.

The Board of Directors has approved internal limits which restrict the short-term maturity of liabilities within different time frames. The various maturities are subject to stress testing based on a bank-specific crisis, a systemic crisis and a combination thereof, and a contingency plan has been established to handle market events. In addition, limits have been set for structural liquidity risk, which implies that lending to customers should largely be financed through customer deposits, subordinated capital and long-term funding. Ordinary senior bond debt and covered bonds are the major sources of long-term funding. The banking group's ratio of deposits to net loans was 66.2 per cent at end-June 2017, up from 62.9 per cent a year earlier. The ratio of deposits to net loans in DNB Bank ASA was 137.3 per cent at end-June 2017.

The short-term funding markets were sound in the second quarter of 2017. The European market has been characterised by limited interest in short maturities, while the rising yield curve in the US has rekindled interest in longer maturities. In line with expectations, more banks are able to use the US commercial paper market, which has resulted in a certain rise in prices for DNB and the bank's Scandinavian peers. DNB had ample access to short-term funding throughout the quarter.

The level of activity in the long-term funding markets was somewhat lower in the second quarter than in the first quarter, but picked up towards the end of the quarter. Issue activity in the euro market for covered bonds was lower in the first half of 2017 than in the corresponding period in 2016. This was largely due to the final round of the ECB's targeted longer-term refinancing operations, TLTRO, which somewhat reduced the need to issue secured bonds. Activity levels in the market for ordinary senior bonds continued to decline as an increasing number of issuers have started to issue subordinated senior bonds which meet the minimum requirement for own funds and eligible liabilities, MREL. This has also resulted in a higher level of activity in the market for subordinated loans (Tier 2), as such loans have become more interesting to investors than subordinated senior bonds. Prices of both senior bonds and covered bonds remain roughly at the same low level as in the first quarter.

The short-term liquidity requirement, Liquidity Coverage Ratio (LCR), remained stable at above 100 per cent throughout the quarter. At end-June, the total LCR was 123 per cent, with an LCR of 591 per cent for EUR, 147 per cent for USD and 76 per cent for NOK.

The average remaining term to maturity for the portfolio of senior bond debt and covered bonds was 4.1 years at end-June 2017, up from 4.0 years a year earlier. The banking group aims to maintain a sound and stable maturity structure for funding over the next five years.

Note 5 Net interest income

In order to show the sensitivity of the loan portfolio, the discount rate on fixed-rate loans and the margin requirement on margin-based loans have been increased by 10 basis points.

Level 3 bonds mainly represent investments in Norwegian industries and power companies. A 10 basis point increase in the discount rate has had insignificant effects.

| 15 479 | 12 760 | 10 518 | Commercial paper and bonds, held to maturity | 10 518 | 12 760 | 15 479 |

As part of ongoing liquidity management, DNB Bank has invested in a portfolio of securities. The portfolio can be used to regulate the liquidity requirement and as a basis for furnishing collateral for operations in various countries. Among other things, the securities serve as collateral for short and long-term borrowing in a number of central banks and as a basis for liquidity buffers to meet regulatory requirements. With effect from 1 July 2008, the international bond portfolio was reclassified from the category "fair value through profit or loss" to "held-to-maturity investments". In the period following the reclassification some additional investments were classified as held-to-maturity. Portfolios in this category are recorded at amortised cost and written down if there is objective evidence of a decrease in value.

Effects of the reclassifications of the international bond portfolio

By measuring the portfolio at amortised cost, the value of the portfolio as at 30 June 2017 was NOK 0.2 billion higher than if the previous valuation principle had been retained. On the reclassification date, the carrying amount of the portfolio was NOK 88.0 billion, compared with NOK 8.8 billion at end-June 2017. The average term to maturity of the portfolio was 5.1 years, and the change in value resulting from a credit spread adjustment of one basis point was NOK 4.6 million at end-June 2017.

Note 15 Assets and liabilities held for sale

On 25 August 2016 DNB and Nordea announced an agreement to combine their operations in Estonia, Latvia and Lithuania. The transaction is conditional upon regulatory approvals, and is expected to close during the fourth quarter of 2017. Nordea and DNB will have equal voting rights in the combined bank Luminor, while having different economic ownership levels that reflect the relative equity value of their contribution to the combined bank at the time of closing.

Once the transaction has been completed DNB Bank ASA will no longer have full control of its subsidiaries, but will be involved in the financial and operating policy decisions of the new company established together with Nordea. At end-June 2017 all assets and liabilities related to DNB's Baltic operations were presented as held for sale, while there were no changes in the presentation in the income statement. The capital adequacy reporting was not affected. No impairment loss has been recognised in the income statement following the reclassification. The subsidiaries are part of DNB's Large corporates and international customers segment. Following the completion of the transaction, DNB's ownership will be consolidated on one line in the financial statement according to the equity method.

The table below shows consolidated balance sheet amounts reclassified as assets and liabilities held for sale.

|---|---------------------|---------------------|---------------------|---------------------|---------------------|
| | 2nd quarter 2017 | 1st quarter 2017 | 4th quarter 2016 | 3rd quarter 2016 | 2nd quarter 2016 |
| Profit for the period | 4 702 | 4 252 | 4 988 | 3 808 | 4 221 |
| Actuarial gains and losses | | | (35) | (106) | |
| Items that will not be reclassified to the income statement | | | (35) | (106) | |
| Currency translation of foreign operations ¹⁾ | 892 | 530 | 3 561 | (4 320) | (1 341) |
| Currency translation reserve reclassified to the income statement | | | | | (43) |
| Hedging of net investment ²⁾ | (516) | (252) | (2 415) | 2 950 | 843 |
| Investments according to the equity method ³⁾ | 12 | 87 | 4 | 4 | |
| Investments according to the equity method, reclassified to profit and loss ³⁾ | | | | | (855) |
| Items that may subsequently be reclassified to the income statement | 388 | 365 | 1 150 | (1 366) | (1 396) |
| Other comprehensive income for the period (net of tax) | 388 | 365 | 1 115 | (1 472) | (1 396) |
| Comprehensive income for the period | 5 090 | 4 617 | 6 103 | 2 337 | 2 825 |

1) Currency translation effects related to the Baltics represented a gain of NOK 574 million in the second quarter of 2017.

2) Hedging of net investments in the Baltics represented a loss of NOK 372 million in the second quarter of 2017, net of tax.

3) DNB had indirect ownership interests in Visa Europe through its membership in Visa Norge. In connection with the valuation of the holdings in Visa Europe as at 31 March 2016 an accumulated gain of NOK 855 million was recognised in other comprehensive income. Upon the completion of the acquisition of Visa Europe by Visa Inc in the second quarter of 2016, this amount was reclassified to profit and a total gain of NOK 1 128 million was recognised as "Profit from investments accounted for by the equity method" in the income statement.

Alternative performance measures

The banking group's alternative performance measures (APMs) present useful information which supplements the financial statements. These measures are not defined under IFRS and may not be directly comparable with other companies' adjusted measures. The APMs are not intended to be a substitute for, or superior to, any IFRS measures of performance, but have been included to provide insight into DNB's performance and represent important measures for how management governs the company and its business activities.

Key financial ratios regulated by IFRS or other legislation (CRR/CRD) are not considered APMs, neither are non-financial data. The banking group's APMs are presented in the financial highlights and in the directors' report. APMs are shown with comparable figures for earlier periods.

The banking group's APMs and definitions

Return on equity (ROE), and Return on allocated capital

These measures give relevant information on the banking group's profitability by measuring the ability to generate profits from the shareholders' investments. ROE is one of DNB's main financial targets. Return on allocated capital is used to assess the profitability of the segments in relation to their use of capital and ensures that the returns achieved by the various segments are measured on a comparable basis.

- Return on equity (ROE) is calculated as: Shareholders' share of profits for the period divided by average equity excluding additional Tier 1 capital.
- Return on allocated capital is calculated as: Profit for the period divided by allocated capital. Allocated capital for the segments is based on DNB's capital adequacy requirement for credit risk, market risk and operational risk. See also note 2 Segments.

Average interest rate spreads

These measures give relevant information on the banking group's net interest income by measuring the respective average interest rate relative to the 3-month money market rate.

- Average spread for ordinary lending to customers is calculated as: Margin income on performing loans relative to average performing loans for the period. Margin income is defined as interest income on the loans less funding costs corresponding to the 3-month money market rate.
- Average spread for deposits from customers is calculated as: Margin income on deposits relative to average deposits for the period. Margin income on deposits is defined as estimated interest income on the deposits based on the 3-month money market rate less interest expenses on the deposits.
- Combined weighted average interest spread for lending to and deposits from customers is calculated as: Total margin income on loans and deposits relative to total average performing loans and deposits.

Net non-performing and net doubtful loans and guarantees in per cent of net loans, Impairment relative to average net loans to customers and Individual impairment relative to average net loans to customers

These ratios are included to show the banking group's provisions relating to credit exposure.

- Calculated as: Net non-performing and net doubtful loans plus guarantees divided by net loans.
- Calculated as: Impairment divided by average annualised net loans to customers.
- Calculated as: Individual impairment divided by average annualised net loans to customers.

Ratio of customer deposits to net loans to customers at end of period, also adjusted for short-term money market deposits

These measures give relevant information on the banking group's liquidity position.

- Calculated as: Customer deposits divided by net loans to customers at the end of the period. Customer deposits minus short-term money market deposits divided by net loans to customers at the end of the period.

Cost/income ratio

This ratio is included to provide information on the correlation between income and expenses and is considered to be one of DNB's key financial targets.

- Calculated as: Total operating expenses divided by total income.
